FYI...Mobilized START for air monitoring. Just got off the phone with Houston, they said a Command Post should be set up in Morgan City in about 30min...they didn't have a contact or any other info for the incident yet. They are aware EPA is sending START and I will touch base with them again in 30...unless Mike gets info any sooner he can pass on. Thanks.

Ronnie,

Thanks for the head's-up. I'm sure SHG has (or is very close) to opening up CERCLA for this response.

Per your earlier email, the HSC is closed. I have heard that local officials have ordered citizens to shelter in place.

V/r,

Mike,

This is an FYI. Our phone duty officer (Jhana Enders) is going to reach out the USCG Houston for coordination. Due to shelter in place, we are going to send a contractor to conduct air monitoring.

9636273

Ronnie

Subject: Collision in Houston Ship Channel -- RRT-6 ALERT

Good Afternoon,

We just received notification from Sector Houston-Galveston about a collision near Light 86 in the upper Houston Ship Channel (Morgan Point area). The 600 ft M/V Carla Maersk was loaded with 216,000 barrels of MTBE; unknown quantity released. The 623 ft M/V Conti Peridot is a bulk carrier (steel cargo).

Initial summary follows:

- Incident occurred at 1247 CT on Mon, 9 Mar 2015
- M/V Carla Maersk reports three port cargo tanks are breeched & leaking (unknown quantity released)
- No injuries reported
- M/V Conti Peridot damage is unknown; no discharge
- Tide is falling (high tide was within last hour)
- Fog is impacting ability to conduct overflight; USCG will arrange once weather permits

USCG is in initial assessment phase. I will provide additional details once obtained.

Pls let me know if I can answer any questions. Thx!

V/r,

Mike Sams
